

2014 Kathleen Hospitalization, Rehabilitation, and Home Care Pictures

Kathleen Werner does not like to have pictures taken when she is not at her best.

Unfortunately, some of the situations have to be photographed. Katherine is always there for “selfie” photos with Kathleen. Here is a good one after the I & D on 4/21/2014 that led to some good Occupational Therapy (OT) and

Physical Therapy (PT) in either the 3rd Floor “GYM” or 2nd Floor “GYM” Marlton Rehabilitation Hospital.

Kathleen always tries to “grin and bear it” regardless of the pain and strain of trying to get through PT and OT.

Kathleen was not able to be

cared for at Marlton Rehabilitation Hospital after the 6/13/2014 spacer installation as she was weight bearing on only one leg. This picture is of the first movement to a wheelchair at Power Back Rehabilitation. It took three people to move her from bed to wheelchair and back to bed.

Because of the non-weight bearing left leg, we were advised to take Kathleen home for the period between the left knee tap on 7/31/2014 and the then scheduled surgery on 8/22/2014.

The Care Managers at Power Back were able to arrange for us to obtain a hospital bed with trapeze, Bayada

Home Care RN, PT, OT, and even Wound Care for the left leg ankle sore, Home to Stay 24/7 Live In CAN, and even IV anti-biotics to be self administered by Kathleen.

Kathleen wanted to be set up in our old living room but then discovered there was no TV hook up in that room any longer so we moved her to the Home Theater / Fireplace Room.

Katherine was so kind as to bring her whole family with a dinner for all to our home on Wednesday, 8/13/2014, to give Kathleen a bit of a send off to the Virtua Marlton Hospital where the rescheduled surgery to remove her spacer and give her a brand new left knee replacement was scheduled for 8/15/2014.

Here is the picture of the family with Kathleen on Wednesday, 8/13/2014.

Katherine was of great assistance in helping Kathleen get ready for and into surgery on Friday, 8/15/2014. She took pictures of Kathleen by herself and with her surgeon, Dr. Merrick J. Wetzler, MD.
